

## Expert Lecture in Chemistry on Organic Spectroscopy - 17 July 2025

Today at SSCC, a renowned chemist, Dr. Ravindra Gol, delivered an expert lecture on organic spectroscopy, providing valuable insights into the analytical techniques used to identify and characterise organic compounds.

Dr Ravindra M Gol is an Assistant Professor at Municipal Arts and Urban Bank Science College, Mehsana. He is MSc, PhD, and GSET qualified, having teaching experience of more than a decade along with immense research in the field of Chemistry.

The lecture covered various aspects of organic spectroscopy, including: Infrared (IR) Spectroscopy, NMR, and Mass Spectrometry. Dr Gol emphasised the crucial role of organic spectroscopy in understanding the structure and properties of organic molecules. He further discussed the practical applications of organic spectroscopy in various industries, highlighting its significance in research and development. The expert lecture was attended by our principal, Dr Raji Dennis, vice principal, Dr Salma Ghanchi, Head of Science, Dr Margi Bhatt, along with other science faculty and 50 BSc students of Chemistry.
