

## SAMARPAN SCIENCE AND COMMERCE COLLEGE

Under the able leadership of our Trustee sir, Shri Mahendrasinh Vaghela, registrar sir, Dr MD Pande, and with magnanimous support of principal, Dr Raji Dennis, SSCC organised an Expert Lecture in Botany on 20th August. The session was delivered by Dr. Goral Jani, Asst Prof and Head, Dept of Botany, Govt Arts & Science College, Bavla.

In her lecture, Dr. Jani introduced students to the emerging field of Plant Neurobiology and explained how plants exhibit remarkable abilities beyond conventional understanding. She elaborated on the ways in which plants possess senses comparable to human beings—such as the ability to sense, smell, touch, hear, and even communicate or interact with one another.

Dr. Jani inspired the students to pursue research in this domain and assured her support in guiding and assisting them in publishing research papers.

The event proved to be highly informative and thought-provoking, leaving the students motivated to further explore the intricate and fascinating aspects of plant life.
